Projects

Culinary Word-Guess Game | Role: Designer and Developer

GitHub Repo: https://github.com/MochaCosine1206/Word-Guess-Game.git **| Deployed Link:** https://mochacosine1206.github.io/Word-Guess-Game/
A fun and entertaining word-guess game, based on hangman.

- Utilizing Twitter Bootstrap as a framework along with javascript, this project is a demonstration of dynamic page styling, javascript timing, and multi-level play.

Triv | Role: Designer and Developer

GitHub Repo: https://github.com/MochaCosine1206/TriviaGame.git **| Deployed Link:** https://mochacosine1206.github.io/TriviaGame/
A challenging and retro-themed trivia game based on the Open Trivia DB API.

- Handcrafted HTML and CSS code without frameworks, this project demonstrated dynamic page elements and endless trivia possibilities through the Open Trivia DB API.
- Additional functionality included selectable trivia categories, non-repeating questions and answer sequences and responsive design using javascript and jQuery.

GifBank | Role: Designer and Developer

GitHub Repo: https://github.com/MochaCosine1206/Giftastic.git **| Deployed Link:** https://mochacosine1206.github.io/Giftastic/
Find and Collect all your favorite gifs, based on the Giphy API.

- Search for gifs from the Giphy API and keep them in your "GifBank", a favorites system created with

localstorage.
- Utilized the Materialize framework, along with javascript to create a programatically evolving color scheme.

Tasty Maps | Role: Javascript Developer

GitHub Repo: https://github.com/MochaCosine1206/teamProject1.git **| Deployed Link:**
https://mochacosine1206.github.io/teamProject1/
Search the curated Zamato database to find places to eat near you.

- Geolocation and reverse geocoding power this multi-API app.
- Pull great nearby restaurants and other relevant information such as maps, weather, and supplemental wikipedia information through open source tools such as Nominatim, Leaflet, OpenWeatherMaps, Wikipedia, and Zamato!

Relevant Experience

Avnet Inc. / Systems Developer II
Mar 2017 - PRESENT, Phoenix, Arizona

- Implemented hundreds of reports, working along key stakeholders throughout the business.
- Utilized complex data systems, enterprise-wide, communicating with a diverse knowledge-base of team members to ensure proper logic and quality project implementation.
